 - b) in the case of book-entry securities kept in a member's registration, the CDCP shall notify the member of this fact in electronic form. Immediately after receiving the CDCP's notice, the member must record the lien in the relevant owner's account and notify the CDCP, in writing, whether the lien has been successfully registered in compliance with the instruction to register the lien. Immediately after receiving the CDCP's notice, the holder must record the lien in the relevant account and notify the CDCP, in writing, whether the lien has been successfully registered in compliance with the instruction to register the lien. If the lien has not been successfully registered in the account, the holder must include the reasons in the written notice. The holder shall be liable for damage resulting from a violation of these obligations.
- 23.9 If, after registration of a contractual lien over book-entry securities in the Pledge Register, the lien fails to be recorded in the account of the pledged security without the CDCP's fault, the CDCP shall not be liable for the resulting damages.

- 23.12 A precondition for registration of change of a lien can be, primarily, a change of data:
- a) on the pledgee;
 - b) on the pledgor;

- 23.14 The instruction to register a change/termination of contractual lien shall be submitted to the CDCP/member/holder by authorised persons, applying the manner and procedure pursuant to Section 23.3 of this Article, whereby in the case of change of a lien, the acquirer of the pledge is also a liable person pursuant to the Act. If there is a change in the person of the pledgor due to the pledgee's exercise of the lien, such change need not be registered in the Pledge Register. This does not affect the obligation to register the termination of lien. After the change or termination of lien is registered in the Pledge register, the procedure pursuant to Section 23.8 of this Article will apply accordingly.
- 23.15 The instruction to register a change/termination of lien must appropriately contain the information specified in Section 23.7 of this Article, as well as the number of the security agreement.
- 23.16 The following must be enclosed with the instruction to register a change of lien:

 - b) for lien registered in the Pledge Register after 1 January 2007: a written confirmation of a change in the content of the agreement on pledging the securities or a document evidencing other reason for change of a contractual lien; however, an annex to the security agreement shall not be deemed as a written confirmation of a change in the content of the agreement on pledging the securities;
 - c) the original or officially verified copies of documents evidencing the pledgor's and the pledgee's existence and the manner of procedure pursuant to the legal regulations in effect, as well as documents proving the identity and eligibility of the entity requesting the service.

The document proving the change of contractual lien shall be for instance the declaration of both the original and the new pledgee, if the person of the pledgee has changed on the basis of contractual-legal relation, which is not ruled by the law and order of the Slovak Republic that this contractual-legal relation is not in conflict with the legal regulations of the Slovak Republic.

- 23.17 The written confirmation of a change in the content of the agreement on pledging the securities shall contain information pursuant to Section 21.5 of this Article, plus the information which change is being requested for in the Pledge Register. If the instruction to register termination of lien is being submitted by the pledgor, the pledgee must authorise the pledgor to submit the instruction to cancel the said disposal right suspension. If the pledgee does not submit the instruction to cancel the disposal right suspension that has been registered pursuant to §28 Section 3 Subsection d) of the Act, the pledgee shall be liable for the resulting damage. If the pledgee has issued for the pledgor a confirmation of the fulfilment of obligation by the (pledge) debtor, the pledgor is entitled to submit the instruction to terminate the disposal right suspension, registered pursuant to §28 Section 3 Subsection d) of the Act, without said authorisation.
- 23.19 The provisions on the establishment and termination of lien pursuant to this Article shall not apply to the establishment and termination of a lien whose registration has been handed over pursuant to §40c) of the Collective Investment Act.
- 23.20 The provisions on termination of lien according to this Article shall not apply to termination of lien pursuant to §118i) Section 16 of the Act. A lien is terminated in the Pledge Registry and this fact is simultaneously registered in the owner's account; in the case of registration of a lien pursuant to §53a) of the Act, the lien in the owner's account is terminated the moment the shares are acquired by the applicant that has decided to apply the squeeze-out right pursuant to §118i) of the Act.
- 23.21 When ISIN of book-entry security was changed (e.g. change of the prefix "CZ" or "SK"), it is possible to execute termination of lien in the Pledge Register also in case that ISIN was not changed in the Pledge Register. In such situation CDCP/member/holder shall cancel indication of the lien on the owner's account or on the account in the holder's registration for new ISIN.
- 23.22 If the proxy is a person authorized for conclusion of security agreement to securities and for placing the instruction to register the lien, it is deemed that he is authorized to sign the written confirmation on content of security agreement.
- 23.23 If the lien is not to extinct, reduction in the number of pledged securities is considered, from the point of view of the Pledge Register, for amendment of lien.

Types of transactions and their settlement

- 3.1 Transactions with financial settlement are cleared and settled via the 'delivery versus payment' (Dip) method, i.e. financial instruments are delivered against payment. The clearing of liabilities and claims is performed on the side of financial instruments and financial means; the financial instruments are only delivered if the financial counter-value is delivered and vice versa.
- 3.2 In the CAC's terms, 'delivery versus payment' means the guarantee of the CDCP that the transfer of financial instruments from the transferor's account to the transferee's account in the registration of the CDCP or a member will not be made without the fulfilment of financial obligation of a participant in the clearing and settlement system within the payment system and, vice versa, the guarantee that the financial claims of a participant in the clearing and settlement system within the payment system will not be satisfied without the transfer of financial instruments.
- 3.3 Transactions without financial settlement are settled via the 'free of payment' (FoP) method, i.e. liabilities and claims are cleared only on the side of financial instruments and the financial instruments are delivered directly through transfer – without delivering a financial counter-value.
- 3.4 A public offer to take over shall always be cleared and settled via the 'DvP' method..

Article 4

- 4.1 When calculating the amount of obligations/claims resulting from transactions in financial instruments, the CDCP shall use the following two methods:
- a) the ‘netting’ method
 - b) the ‘gross’ method.
- 4.2 The ‘netting’ method is a mutual accounting of the obligations/claims of participants in the clearing and settlement system. Multilateral netting is used for clearing of positions on the side of financial means; the positions on the side of financial instruments are determined for each transaction separately. The positions of individual participants in the clearing and settlement system shall be determined on the basis of transactions that have been cleared by the netting method.
- 4.3 The ‘gross’ method determines the value of obligation/claim of a participant in clearing separately for each transaction.
- 4.4 The ‘netting’ method is the primary clearing method for stock exchange transactions with financial settlement, unless the BSSE stipulates otherwise in the Stock Exchange Rules.
- 4.5 OTC transactions with financial settlement shall be cleared via the ‘gross’ method.
- 4.6 Transactions resulting from obligatory public offers to take over shall not enter the clearing by netting method along with other transactions. For the participants in clearing, the positions on the side of financial means shall be determined separately for every public offer to take over.
